ABOUT US

WORKWEAR INDUSTRIES founded in 1991 and still, PROUDLY AUSTRALIAN OWNED.

We are Australia's longest established workwear business, that is still managed by the original owners. We are the sole manufacturers of RIGGERS® WORKWEAR, RIGGERS® FOOTWEAR, and PROGARD® PROTECTION.

Each one of our brands provides an extensive range of superior quality protective workwear. We have established a reputation for excellence and quality in the Safety environment. We supply the Mining, Engineering, Construction, Oil & Gas and many other industries. Whether you are a small business or a multi-national organization, RIGGERS WORKWEAR has the systems, processes, facilities, and passion for delivering the best workwear solutions for your business.

Our products are independently tested and comply with AS/NZS and CE safety standards. Our Company is proud to be an ISO 9001:2015 accredited organization, and we strive to increase our efficiency by continuously improving our systems and processes.

We guarantee to provide the highest quality products, unmatched customer service and support, and the best value for money.

INDUSTRIES SERVICED

Some of the prime industries we service include:

- Mining & ResourcesEngineering
- Oil & Gas
- Agriculture
- Building & Construction
- Logistics & Transport

Road & Rail Traffic Control

Some of the products and services we specialise in include:

- Workwear
- Safety Footwear
- Rainwear

- PPE
- Fire Retardant Wear
- Chemical Protective Wear

FROM THE DIRECTOR

In 1991, I realised there was an opportunity to create a range of work wear & safety products for the Australian market with greater levels of superior quality, innovative designs and excellent value for money than what was available at the time. I also believed strongly in taking Customer Service to a level previously unseen in Australia.

This opportunity became a reality when I created the RIGGERS[®] range of work wear. More than twenty years later we are still focused on our three core principles; QUALITY, SERVICE and VALUE.

In 2013 we moved into our new custom-built office and warehouse in Malaga, WA, offering state-of-the-art facilities for our staff and customers.

I have always embraced and believed in keeping up with technology. In addition to our new premises, we have also made other vast advancements within the company over recent times.

Our investment in the latest high-speed embroidery and sewing machines supports our 'Total Service and Garment Management Package'. Our newly launched website has all the latest features in online ordering, and we are constantly developing new and exciting products to meet the latest trends and standards.

Workwear Industries is proud to be involved in the safety industry and is now positioned as a major supplier of an extensive range of safety products to the hard working people around the world.

I invite you to view our latest catalogue, featuring our exciting range of new and existing products, and we look forward to assisting you with your requirements now and into the future.

"Assuring you of our best service and attention at all times"

With best wishes,

gl.

Jeff Keiles

Managing Director

OUR VISION

"To continually contribute to the success, safety, and efficiency of our diverse customers through the supply of innovative, quality products and the highest level of customer service."

GARMENT SYMBOLS

These Garment Symbols represent the range of features and properties you will find in RIGGERS® and PROGARD® products. Look for these symbols next to each item:

UPF 50+

These garments have an EXCELLENT Ultraviolet Protection Factor (UPF) complying with or exceeding the requirements of AS/NZS 4399:1996.

UPF 40+

These garments have an EXCELLENT Ultraviolet Protection Factor (UPF) complying with or exceeding the requirements of AS/NZS 4399:1996.

HI-VIS MATERIAL

These garments have been manufactured with certified fluorescent fabric that has excellent visibility in day time environments. Certified AS/NZS 4602.1:2011 and AS/NZS 1906.4:2010.

3M REFLECTIVE TAPE

These garments feature 3M Retro-reflective Tape, an internationally recognised reflective material with excellent visibility when illuminated by a light source in day or night time environments.

ELASTIC BACK

These garments have a sewn-in elasticated back panel, which provides extra moveability and comfort in large-coverage garments such as coveralls.

LONGER TAIL

These garments are manufactured with a lengthened back tail to allow for extra moveability, comfort and protective coverage.

MESH AIR VENTS

These garments have large mesh air vents fabricated into their design for increased airflow and cooling. These have been incorporated into key perspiration points on the garment.

BREATHABLE MATERIAL

These garments are manufactured with material that is lightweight, highly breathable and air permeable to keep the wearer cool.

DOUBLE-STITCHED

These garments have reinforced doublestitching with heavy cotton thread, promoting extra strength and durability and extending the life of the garment.

EXTRA BUTTONS

These garments come with extra buttons, for convenient replacement in the case of a button detaching from the garment due to force or abrasion and becoming lost.

WATER PROOF

These garments are 100% waterproof, utilising materials that are impermeable to water splash, spray and vapour. They also have welded or sealed seams throughout the entire garment.

ANTI-MICROBIAL

These garments have specialised material that inhibits the growth of bacteria and microorganisms. This eliminates odour formation and prevents skin conditions such as tinea.

CHEMICAL PROTECTANT

These garments are made of specialty materials that are impermeable to solid, liquid and gas chemicals, whilst still allowing the body to breathe and move easily. Certified AS-3765.1-1990.

ANTI STATIC

EUROPEAN NORMS (EN) SYMBOLS

These garments are Static Neutral - they use specific fibres that do not attract static electricity, eliminating the risk of electric shock to the body.

FIRE RETARDANT

These garments are made of fire retardant fabric, thread, buttons and zippers, and provide effective burn protection whilst keeping the wearer cool. Certified AS/NZS 4824:2006

TYPE 5

See 'Quality & Safety Standards' overleaf for definitions.

QUALITY & SAFETY STANDARDS

The WORKWEAR INDUSTRIES Group is an ISO accredited organisation. Our commitment to continuous improvement is underpinned by our Quality Management System. We use only the finest quality fabrics and dyes for our garments, and each item is manufactured in a quality assured facility in accordance with the ISO 9001 standard.

Products from the RIGGERS® and PROGARD® ranges are also compliant with the following Safety Standards:

AS/NZS 1906.4:2010 HIGH VISIBILITY MATERIALS FOR SAFETY GARMENTS

This standard outlines the high visibility requirements for the materials that are used in the manufacture of safety garments. This includes the photometric performance levels and luminosity ratings of retro-reflective and fluorescent materials, to ensure that when the materials are constructed into a garment they maintain an excellent visibility rating and provide the wearer with optimum prominence in high-risk working environments.

AS/NZS 4602.1:2011 HIGH VISIBILITY SAFETY GARMENTS - GARMENTS FOR HIGH RISK APPLICATIONS

This standard outlines the high visibility manufacturing requirements for safety garments worn in high-risk environments, to ensure excellent visibility in industrial situations where the wearer may need to be easily seen from a distance, against complex visual backgrounds and in poor visibility conditions. This includes the percentage of high visibility material used in the garment and the configuration of the material within the garment construction.

AS/NZS 4399:1996 SUN PROTECTIVE CLOTHING - EVALUATION AND CLASSIFICATION

This standard outlines the protective requirements for the materials used in the manufacture of a garment against Solar Ultraviolet Radiation. The resistance level of the fabric is measured to establish an Ultraviolet Protection Factor (UPF). The UPF of a garment is classified into three numbered category levels: GOOD Protection (UPF 15, UPF 20), VERY GOOD Protection (UPF 25, UPF 30, UPF 35) or EXCELLENT Protection (UPF 40, UPF 45, UPF 50, UPF 50+).

AS 2001 METHODS OF TEST FOR TEXTILES

This standard provides manufacturers and testing bodies with an industry recognised level of suitable test methods to determine the maximum breaking force and extension of textile fabrics. The results of these tests are ranked on a scaling system to define the fabric's level of resistance. Every RIGGERS® garment is tested to this standard and all results rank exceedingly high in the scaling system.

AS-3765,1-1990 PROTECTION AGAINST GENERAL OR SPECIFIC CHEMICALS

This standard outlines the performance requirements for materials and construction of safety garments designed to protect the wearer from general or specific chemicals. These chemicals can be of a solid, liquid or gas composition.

These safety garments must provide complete physical protection to prevent chemical contact with the wearer at all times.

AS 4824:2006 PROTECTIVE CLOTHING FOR FIREFIGHTERS

This standard outlines the performance requirements for protective clothing designed for use for extended periods during wildland fire fighting and associated high-risk fire hazardous workplace environments. This protective clothing should be light, flexible, and provide effective burn protection without introducing heat stress to the wearer. The RIGGERS® Fire Retardant Range also features a number of Internationally recognised safety certifications in addition to this standard - see the Fire Retardant Range section in this catalogue to view the complete list.

INTERNATIONAL AND EUROPEAN STANDARDS

The CE Symbol For products manufactured in accordance to European Norms by an ISO 9001 Quality Certified manufacturer

EN ISO 13982-1:2004 Chemical Protective Clothing resistant to penetration by airborne solid particles (Type 5)

EN 13034 Chemical Protective Clothing resistant to penetration by liquid chemicals (Type 6)

EN 1149-1 Protective Clothing with Electrostatic properties

EN 471 Professional High Visibility Clothing requirements and test methods

The RIGGERS Hi Vis Shirt range maintains optimum visual standards that will last the lifetime of the garment. The entire range is compliant with High Visibility Safety Standards AS/NZS 1906.4:2010 and AS/NZS 4602.1:2011, and Sun Protective Clothing Standard AS/NZS 4399:1996.

All reflective RIGGERS Hi Vis Shirts feature high quality Certified Reflective Tape, internationally recognised for its certified standards and excellent visibility.

Reflective tape configurations can also be added or customised on any garments to suit specific workplace safety requirements - see our 'Sewing and Embroidery' section (pg. 82-83).

RIGGERS Safety Vests are an essential PPE item in industrial workplaces.

They have the ability to maximise your visibility in both day and night conditions, and reduce the risk of workplace accidents that may occur due to poor visibility.

RIGGERS Safety Vests are compliant with High Visibility Safety Standards AS/NZS 1906.4:2010 and AS/NZS 4602.1:2011, and Sun Protective Clothing Standard AS/NZS 4399:1996.

The RIGGERS
Work Shirt range
are a level of class
above the rest

Hardwearing, durable and tough, the range of RIGGERS Work Shirts have been manufactured with extra-strength materials, enabling them to withstand harsher wear & tear and last longer than the average work shirt.

Heavy duty double-stitching, pleated action backs with longer tails, and extra deep pockets are standard features on every shirt.

RIGGERS Work Shirts comply with High Visibility Safety Standards AS/NZS 1906.4:2010 and AS/NZS 4602.1:2011, and Sun Protective Clothing Standard AS/NZS 4399:1996.

These garments are certified fire retardant to Australian Standards

The RIGGERS Fire Retardant Range features the advanced flame resistant fabric technology from Indura UltraSoft

All sewing thread, buttons, zippers and reflective tape used on these garments also each hold certified fire retardant ratings - making the RIGGERS Fire Retardant Wear the safest workwear to protect against fire and heat hazards in the workplace

RIGGERS FR Range protects against workplace burn hazards such as:

- Flash fire
- Electric arc flash / arc blast
- Molten ferrous metals
- Heat & thermal burn
- Welding exposure

Westex UltraSoft®

The SAFETY of any flame resistant garment is in the FABRIC

Many companies are selling FR garments today without disclosing the FR fabric manufacturer. Literally, dozens of imitation "88/12" FR fabrics have emerged in the marketplace recently, and they are NOT "EQUAL."

Critical performance characteristics like arc rating, comfort, shrinkage control, garment wear life, FR durability to laundering, compliance to national and international standards and more are primarily dependent on the BRAND of flame-resistant FABRIC used to make the garment.

This is why we only use Westex UltraSoft® fabric for our RIGGERS FIRE RETARDANT WORKWEAR, which delivers all of the above benefits consistently — backed with decades of market-proven performance.

DON'T ASSUME your garment is made with Westex UltraSoft® — SPECIFY and be sure!

The RIGGERS Ladieswear Range has been tailor made specifically to suit the women in the industrial workplace. We understand the importance of correctly fitting clothes on the job, not only for safety purposes but also to optimise comfort and productivity.

Adjustable waistbands, side splits, extra pleating and tailor-fitting are all additional features you will find in these garments, along with our reputable tough material and durable stitching

The entire range of RIGGERS Ladieswear Range complies with High Visibility Safety Standards AS/NZS 1906.4:2010 and AS/NZS 4602.1:2011, and Sun Protective Clothing Standard AS/NZS 4399:1996.

We've tailor made our RIGGERS workwear to suit all women

RIGGERS

BOOTS TECHNOLOGY

WITH SELF CLEANING PROFILE

SHARP SHIELD

Our sharp shield anti-penetration layer keeps users safe from sharp hazards. **HEAT PROOF**

Our outer sole is heat proof to 300 degrees Celsius

HI-GRIP

Riggers Hi-grip gives greater grip profile and traction. **SOL-FLEX**

Sol-flex gives the ball of the boot maximum flexbility for maximum comfort. **OIL RESIST**

Oil & Fuel resistance across the entire boot, most notably the sole.

ANTI-STATIC

Anti-static sole keeps users safe from static charge buildup that could cause combustion. SHOCKABSORB

Shock absorbing construction delivers comfort day after day. **WEAR METER**

Wear indicator keeps track of your boots and easily shows when a replacement pair is necessary.

Slip resistant sole offers protection against the hazard of losing footing.

Our second generation soles are packed with features for safety, comfort and useability.

DISPOSABLE COVERALLS AND ACCESSORIES

INTERNATIONAL AND EUROPEAN NORMS SAFETY RATINGS:

TYPE 5 - Particle tight clothing protection tested to EN ISO 13982-1

TYPE 6 - Limited light spray of liquid chemical protection tested to EN 13034

Conformity to European Standards for Chemical Protective Clothing

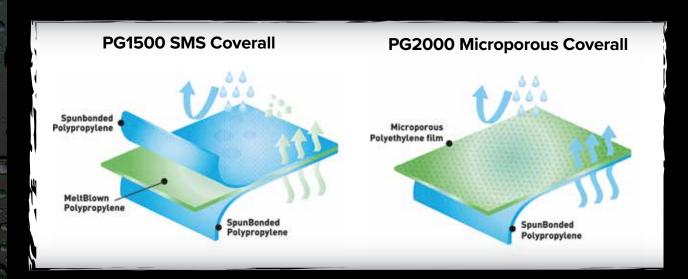

Anti-static tested to EN1149-1

The CE marking is a European marking of conformity that indicates these products comply with the essential requirements of the applicable European laws or directives with respect to safety, health, environment and consumer protection.

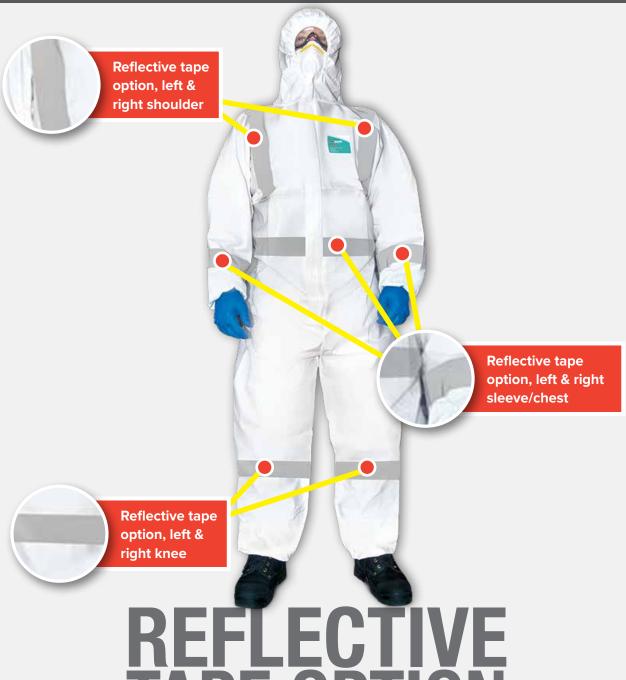

LAYERED FIBRE DIAGRAMS:

The PROGARD PG1500 SMS Coverall features a 3-layered material construction, utilising an inner and outer layer of spunbonded polypropylene and a middle layer of meltblown polypropylene. This creates an effective protective barrier whilst allowing breathability and circulation to the body.

The PROGARD PG2000 Microporous Coverall features a 2-layered material construction, consisting of an inner spunbonded polypropylene layer and a microporous polyethylene film outer layer. This creates a lightweight protective barrier with great chemical protectant properties.

REFLECTIVE TAPE OPTION 2000 & 1500 ONLY

• PROTECTION • PERFORMANCE • SAFETY • COMFORT

We've got you covered!

is ever spared to detail.

The Workwear Industries complete In-House Embroidery and Sewing Services include:

LOGO DIGITISING

We operate the latest state-of-the art embroidery software, featuring advanced imaging technology. With the capability to convert any digital logo or graphic file into a highly detailed digital embroidery file, we can replicate your logo precisely and accurately.

CUSTOM EMBROIDERY

We can customise your garment embroidery to order, and accommodate all requests large and small. Have your staff names, company logos and additional text requirements embroidered onto any material with precision and ease.

NEW PROPERTY OF THE PROPERTY O

REFLECTIVE TAPE APPLICATION

We can have reflective tape applied to your clothing items with strengthened and reinforced stitching. Choose from industry standard or custom configurations. We only use reflective tape on our garments that is compliant with Australian Safety Standards (see pg.90).

BADGE APPLICATION

We can apply fabric badges to your garments upon request, using strengthened and reinforced stitching, We can cater to any size or shaped badge that requires applying to your garments.

SCREEN PRINTING

We can screen print detailed digital graphics onto your garments upon request. Available for general fabric types, as well as for black and dark coloured fabrics. Single-colour or multi-colour print runs available.

TAPE CONFIGURATION GUIDE

Reflective tape can be applied to all RIGGERS garments in the above configurations, or in custom configurations to suit your workplace safety requirements.

Reflective tape configurations are available to apply to long & short sleeved work shirts, work coveralls, jackets, rainwear, vests, trousers and jeans.

All RIGGERS reflective tape applications are double-stitched onto our garments for extra strength, using heavy-duty reflective tape that is rated 'Class R', as pictured here (left).

Request your reflective tape application with our friendly staff today.

SIZE GUIDE

MEN'S

1. Collar

Measure the collar/neck size around the base of the neck. Leave about a finger-width gap for comfort.

2. Chest

Measure around the biggest part of your chest, running the tape under the arms and across the shoulderblades.

3. Waist

Measure around the waist, wrapping the tape around the position where your trousers are usually worn. Leave about a finger-width gap to allow for comfort.

4. Inside Leg

Measure the inside of the leg from the crotch to the hem of your pants. Alternatively, lay a pair of your trousers on a table top and measure the same way.

LADIES

1. Bust

Measure around the chest, running the tape under the arms, around the fullest part of the bust and across the shoulderblades.

2. Natural Waist

Measure around the central part of the torso where the natural waistline sits (find the natural crease by bending to one side).

3. Low Waist

The low waistline sits approx 2 inches below your natural waistline. Run tape around this area to measure.

4. Hip

Measure around the fullest part of the top of the hips, keeping your feet together.

TERMS & CONDITIONS

HOW CAN I ORDER A PRODUCT?

To order products from this catalogue please email your order request to:

sales@riggers.com.au

Please indicate the product CODE, NAME, SIZE and QTY that you require.

You may also phone your order request to us directly on 1300 363 844.

Alternatively, you can visit the WORKWEAR INDUSTRIES website and create an online Customer Account. This allows you to order our products easily and saves your details for on-going use.

Visit our website to create your customer account today:

www.riggersworkwear.com.au

WHAT HAPPENS IF THERE IS NO STOCK AVAILABLE OF AN ORDERED PRODUCT?

WORKWEAR INDUSTRIES will advise the customer when a particular product is not in stock and when stock is expected. WORKWEAR INDUSTRIES will endeavour to dispatch the product as soon as possible.

WHAT WARRANTY DOES WORKWEAR INDUSTRIES OFFER?

WORKWEAR INDUSTRIES warranty extends only to products with defects caused by faulty workmanship or material. The warranty does not cover fair wear and tear or defects relating to the improper use of a product.

WHAT HAPPENS IF AN ORDER IS RETURNED?

WORKWEAR INDUSTRIES will only accept returned goods if the request is made by the customer within 7 days of receiving the order and the goods have not been altered specifically for the customer. All orders must be returned in the original packaging and in saleable condition along with the relevant authorisation details of the return.

Any freight incurred for returned goods will be the customer's responsibility. WORKWEAR INDUSTRIES reserves the right to charge a 10% re-stocking fee on non-faulty returned goods.

WHERE DOES WORKWEAR INDUSTRIES DELIVER TO?

WORKWEAR INDUSTRIES delivers Australia wide:

- (a) Orders below \$300 are subject to a \$20 small order charge. A delivery charge may apply.
- (b) Freight charges outside of metro areas will be for the customer's account. The customer may nominate a carrier of their choice or we can use our regular carrier and on-charge the freight cost. For full freight details, please refer to our latest Terms and Conditions by contacting us today.

Please note:

- * We reserve the right to change the minimum order value and/or small order charges from time to time.
- **All amounts are excluding GST

HOW LONG DOES DELIVERY TAKE?

WORWEAR INDUSTRIES aims to dispatch orders from our warehouses within 48 hours of the order being placed. Depending on your location, delivery will usually be within 2 business days after dispatch, however remote or rural locations may take longer.
